

Performing approval tests during real fire tests with maximum flexibility

Fire tests for approval of fire suppression systems

Institut für Brandschutztechnik
und Sicherheitsforschung

For manufacturers of fire suppression systems worldwide

Our services

- Approval tests and test reports in accordance to EN 14972 Fixed firefighting systems – water mist systems, parts 1, 3, 8–10, 14–16, and standard FM 5560
- Monitoring and performance of real fire tests
- Development of test specifications on the basis of normative requirements
- Development of representative fire tests for special and custom applications

The advantages for you

- Accredited testing, inspection and certification body under ISO/IEC 17025:2017
- Registered as a testing laboratory in the United Arab Emirates
- Use of accredited calibrated measuring technology
- Mobile testing: flexible performance of tests at your premises
- Stationary testing: use of the infrastructure at our partner's research facility, the Zentrum am Berg, for large-scale real fire tests in extensive open areas and in mining, highway and railroad tunnels on a 1:1 scale
